

VERTICAL INK PRINT

LOOKBOOK · VOL. 01

FEATURE WALLS · HOSPITALITY · RETAIL · WORKPLACE · HOME

Art, printed onto the wall.

Large-format murals applied directly to your surface with UV-cured ink, no vinyl, no seams, no drying time.

A blank wall is the biggest opportunity in the room. We print straight onto it.

Vertical Ink Print produces and installs large-scale murals for bars and restaurants, fitness studios, workplaces, and private homes. We work direct-to-surface: UV-cured ink is printed onto the wall and set on contact, no vinyl to peel, no seams to align, no drying time to wait out.

Bring us a finished graphic or a bare wall and a rough idea, we design, print, and finish the feature wall on-site. The result isn't a sticker laid over the surface. It's artwork that becomes part of it.

Ninety Three

93 OCTANE

01 PROJECT

93 Octane

Bar & Eatery / Hand-script + stencil lettering / Glazed subway tile / Full-height feature wall

02 PROJECT

StretchLab

Fitness Studio

Five brand values set across the studio's tallest wall, printed direct in StretchLab's own palette so the lettering stays crisp from the floor up. No decals, no cut-vinyl edges waiting to lift.

SURFACE	Painted drywall
---------	-----------------

SUBJECT	Brand values wall
---------	-------------------

INK	UV-cured, brand-matched
-----	-------------------------

FINISH	Matte
--------	-------

Corporate Office

Conference Room • Photographic Mural

A wall-to-wall autumn birch forest brings the outdoors into a windowless boardroom, full-color, photographic detail printed edge to edge on smooth drywall. The same printer that lays down bold lettering renders continuous-tone photography at 1200 DPI.

SURFACE	Smooth drywall
SUBJECT	Photographic
COVERAGE	Wall-to-wall

04 PROJECT

Private Residence

Primary Bedroom

A pen-and-ink European village runs the length of the headboard wall, hand-detailed and printed in a single matte pass. Proof that direct-to-wall art belongs at home, too, not just on Main Street.

SURFACE	Painted drywall
---------	-----------------

SUBJECT	Line-art landscape
---------	--------------------

INK	UV-cured, single color
-----	------------------------

FINISH	Matte

White Tiger

Studio Feature Wall • Photographic

SOURCE ARTWORK

A high-resolution wildlife portrait taken from file to finished wall at full photographic depth. Printed on-site with our wallPen system, mounted at right, so the artwork lands exactly where it lives. No panels, no seams.

Humpback Whale

Café & Retail • Hand-illustrated

BUILT TO SCALE

A hand-illustrated humpback breaches the wall of a neighborhood café, printed life-size so it reads from the sidewalk. Large-format means large: we scale a drawing to the wall, not the wall to the drawing.

THE DESIGN LIBRARY

If it's a file, we can print it.

Photography, fine art, illustration, branding, or pure concept work. A sample of the range we put on walls.

TOILE & WALLPAPER REPEATS

LANDSCAPE & SCENIC

CONCEPT & 3D EFFECTS

PHOTOGRAPHIC CLOSE-UPS

From blank wall to feature wall.

01 Consult & measure

We visit the space, measure the wall, and talk through the vision. Textured, painted, brick or stone, we assess the surface and confirm it's a fit.

02 Design & proof

Bring your own artwork or work with our designers. We proof the mural to scale before anything touches the wall.

03 Print on-site

Our printer comes to you. UV-cured ink is laid directly onto the surface and set instantly, no drying, minimal disruption to the room.

04 Reveal

Peel-free, seam-free, and built to last 12+ years indoors. The wall is finished the moment we power down.

CAPABILITIES

Print on almost any vertical surface.

13 ft

Maximum print height, murals up to 11.5 ft top to bottom, unlimited width.

1200 DPI

Photographic resolution, gradients, drop shadows, and fine detail.

12 yrs

Indoor color life, scratch- and water-resistant, no peeling.

Zero

Drying time, UV-cured on contact, easy to remove later with paint.

SURFACES WE PRINT ON

Plaster
